

Customer Check in #3.5 Summary

- **Regina Focused:** We need to make sure everything on our page is Regina centred. No generic photos, change our logo, change wording to be more Regina specific.
- **Data Forward:** Make it more obvious that the website has valuable data in it and isn't just general SDG information. In Scott's words our page "doesn't scream data" which is what we need to do.
- **Regin's priorities:** Reorder the homepage to show off more of Regina's priorities as they are currently far down on the homepage and require too much navigation to find. Show more data of Regina that relates to the SDGs.
- **Other concerns:** Remove contact page, About page style didn't match the rest of the website, Use SDG colours for our design, need buttons on pages for easier navigation.
- **Positives:** Liked All SDG "splash page", liked our data page, overall enjoyed the design despite the improvements we need to make.
